

The Shettleston Community Growing

Project (SCGP) is rolling out a re-use scheme for gardening tools and materials. The Gardening Tools Re-use Scheme aims to find good homes for unwanted, but serviceable gardening tools and, at the same time, help reduce the amount of waste sent to landfill. We are asking people to search their cupboards and sheds and donate anything they don't need to us. The SCGP will then make the tools available free of charge to gardeners and growers.

The scheme is being run in partnership with Shettleston social enterprise, Upkeep. **Donated items can be handed in at the Upkeep premises at 24 Fenella Street, Shettleston during normal office hours.**

The scheme is also interested in materials that might be useful for gardeners e.g. wood, paving stones, gravel, bricks etc. For bulky items like these we will make arrangements to pick them up from wherever they are currently located.

If you are a would-be gardener in need of tools or materials or if you would like further information on the scheme, contact **project co-ordinator Marion Bate** on **0141 763 0511**.
